High Complexity: (2 of 3)

**Diagnosis – 4 points**
- New problem w/ work-up = 4 points
- Established problem worsening plus two stable established problems = 4 points
- Four stable established problems (to include side effects being treated or monitored and any co-morbidities/health risk factors being monitored due to treatment = 4 pts

**Data – 4 points**
- Personal review of blood smears or scans, summary of old records each worth 2 points
- Review lab or radiology reports 1 pt each, discuss with performing physician 1 pt, obtain old records 1 pt

**High Risk**
- Iron infusions (if toxicity is probable)
- Blood transfusions (if toxicity is probable)
- Chemotherapy/Radiation
- Chronic condition with severe exacerbation
- Acute or chronic illness that poses a threat to life
- Decision to de-escalate care due to poor prognosis

Moderate Complexity (2 of 3)

**Diagnosis – 3 points**
- New problem w/o work-up is 3 points
- Established problem worsening plus one stable established problem = 3 points
- Three stable established problems (to include side effects being treated or monitored and any co-morbidities/health risk factors being monitored due to treatment = 3 points

**Data – 3 points**
- Personal review of blood smears or scans, summary of old records each worth 2 points
- Review lab or radiology reports 1 pt each, discuss with performing physician 1 pt, obtain old records 1 pt

**Moderate Risk**
- Iron infusions (if toxicity is not probable)
- Blood transfusions (if toxicity is not probable)
- Prescription drug management
- Chronic condition with mild exacerbation
- Two or more chronic conditions
- Undiagnosed new problem or severity of the condition
Low Complexity (2 of 3)

**Diagnosis – 2 points**
- Established problem worsening = 2 pts
- Two stable established problems (to include side effects being treated or monitored and any co-morbidities/health risk factors being monitored due to treatment = 2 points

**Data – 2 points**
- Personal review of blood smears or scans, summary of old records each worth 2 points
- Review lab or radiology reports 1 pt each, discuss with performing physician 1 pt, obtain old records 1 pt

**Low Risk**
- Over the counter Iron
- Hydration without additives
- One chronic condition

Straightforward (2 of 3)

**Diagnosis – 1 points**
- Established problem worsening = 2 pts

**Data – 1 points**
- Review lab or radiology reports 1 pt each, discuss with performing physician 1 pt, obtain old records 1 pt

**Straight Forward Risk**
